The correct candidate can bring a lot of creativity to your company. Therefore, I am applying for this position because I am confident that I can be a good fit for your developing and designing needs. I understand that my general task as a designer are but not limited to attract audience, viewers, clients, and project a trustworthy image to the public. Through my several years of experience, I can state that I am a more capable graphic designer with developing tools to make goals for your company.

In addition, my skills grow over the years and now I can also offer programming skills. My certification is the proof of how I never stop learning, and that I am the kind of person who gets things done.

I am proficient in Photoshop, Illustrator, and InDesign plus many programming languages that I know can make even more attractive and functional your web applications. I started practicing Graphic Design since I was in the university as an intern. Right now, I am ready to take all my skills to the next level, by programming interactive websites. I am looking forward for an interview so we can discuss further details. Thank you so much for reading my cover letter and the consideration for the position. In regards to salary, I am always open for negotiation.

Respectfully,
Reyna Ramirez
